Authoritative Data Creation & Management

The Bedrock of National Trust

Our Methodological Core

Our foundation is a world-class team with dual expertise in both rigorous academic science and applied technology. We don't just analyze data; we architect its creation with scientific precision.

Proprietary Technology: ZdataCloud

This scientifically-grounded platform ensures data quality, integrity, and security from the moment of creation. It's the mission-critical infrastructure that enables our high-stakes national projects.

Trusted by the Nation

National Mental Health Surveillance

Since 2022, we have been the trusted partner for the Saudi Government in developing and executing this critical public health program.

Ministry of Defense Data Optimization

Our work with the Ministry of Defense proves our capacity to generate high-quality, trusted reports for strategic decision-making.

Advanced Analytics & Simulation

From Raw Data to Future Insight

Empowering Experts

The IDM Prediction Model Simulator

This tool puts our power in your hands. It allows researchers and data scientists to instantly transform complex prediction models into live, interactive applications.

Solving Grand Challenges

The IDM.sa Traffic Simulation Model

A copyrighted, high-precision tool that generates its own data to simulate complex highway congestion and test policy decisions before real-world implementation.

[Try the Simulator]

Case Study: The IDM.sa Traffic Simulation Model

Key Features:

- Custom Scenario Design
- Scientific Rigor with Billions of Computations
- Advanced Policy Testing
- Real-Time Visualization for Stakeholders

Practical Example:

Testing a minimum speed limit of 80 km/h vs. no limit on a 3-lane highway.

Result: Significantly lowered congestion and reduced average travel times.

Strategic Communication & Dissemination

Maximizing Impact, Driving Action

The Comprehensive Communication Package

An insight is only valuable if it's understood. We translate data for any audience.

For Scientific Peers

Rigorous peer-reviewed papers that validate our methodology and contribute to the global academic community.

For Decision-Makers

Visually interactive reports and dashboards that provide clear, actionable insights for leadership.

For The Public

Technical findings converted into compelling, layperson-friendly content ready for mass distribution.

Take a Look at Our Dashboards

Our Proprietary Distribution Engine

We don't just create content; we own the channels to guarantee reach and amplify impact.

3qool.net

The Voice of Science in Arabic: We engage the Arabic-speaking world with accessible content.
